

Assignment No.9

Problem Statement : Write a program to implement MySQL/Oracle database connectivity with any front end language to implement Database navigation operations (add, delete, edit etc.)

Program :

```
package MySql;

import java.sql.*;
import java.util.Scanner;

public class MySql {

    public static void main(String[] args) throws Exception {

        int n,sno;

        String name,telephone,gender;

        Scanner in=new Scanner(System.in);

        Connection
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/[Database]","[Username]",
"[password]");

        Statement stmt=con.createStatement();

        PreparedStatement pstmt=con.prepareStatement("insert into Personal
values(?,?,?,?)");

        PreparedStatement pstmt1=con.prepareStatement("delete from Personal where
sno=?");

        System.out.print("Enter the no of record you want to insert:");

        n=in.nextInt();

        for(int i=0;i<n;i++) {

            System.out.print("\nData"+(i+1)+"\nEnter Sno:");

            sno=in.nextInt();

            pstmt.setInt(1,sno);

            System.out.print("Enter Name:");

            name=in.next();

            pstmt.setString(2,name);

            System.out.print("Enter Telephone:");

            telephone=in.next();
```

```

        pstmt.setString(3,telephone);

        System.out.print("Enter Gender:");

        gender=in.next();

        pstmt.setString(4,gender);

        pstmt.executeUpdate();

    }

    ResultSet rs=stmt.executeQuery("Select * from Personal;");

    System.out.println("\nAfter Insertion");

    System.out.println("Sno\tName\tTelephone\tGender");

    while(rs.next()){

System.out.println(rs.getInt(1)+"\t"+rs.getString(2)+"\t"+rs.getString(3)+"\t"+rs.getString(4))
;

    }

    System.out.print("Enter the no of record you want to delete:");

    n=in.nextInt();

    for(int i=0;i<n;i++) {

        System.out.print("\nData"+(i+1)+"\nEnter Sno:");

        sno=in.nextInt();

        pstmt1.setInt(1,sno);

        pstmt1.executeUpdate();

    }

    ResultSet rs1=stmt.executeQuery("Select * from Personal;");

    System.out.println("\nAfter Deletion");

    System.out.println("Sno\tName\tTelephone\tGender");

    while(rs1.next()){

System.out.println(rs1.getInt(1)+"\t"+rs1.getString(2)+"\t"+rs1.getString(3)+"\t"+rs1.getStrin
g(4));

    }

    con.close(); }}

```
